

MFV 4

Our New Compact Floorstander

Smaller footprint than a standmount
Designed to give excellent bass
performance in a smaller room

Smaller rooms can be difficult to find the right speaker for. Larger speakers are prone to be “boomy”, “Bookshelf” speakers can be difficult to locate in the right place. Whilst stand mount speakers can be clumsy and even hazardous in some situations.

Our new MFV4 is a real space saver with a footprint of only 18 x 24 cm (less than ½ a square foot) and at only 86 cm tall is ideal where a larger speaker would be out of place. The MFV4's 92dB efficiency means that it has only modest power requirements making it ideal for lower powered valve amplifiers.

A well designed efficient loudspeaker with a simple crossover will give vastly improved performance in terms of volume level, spatial image and a more solid controlled bass performance.

A simple yet effective crossover ensures that the signal transfer from the amplifier has the minimum impact in order that the amplifier can “see” the speaker drive units clearly without excessive distortion.

Icon Audio valve amplifiers have a reputation for excellent performance and build quality, but we are aware that they are not always matched to ideal loudspeakers thereby not optimising the sound.

The ease of driving means that as little as 15 watts will achieve an excellent volume ideal for large orchestral works in a large room.

The MFV 4 is also an ideal partner to lower powered SE valve, transistor or hybrid amplifiers. 300B 9w SE amplifiers for example have a breathtaking immediacy and dynamics.

MFV 4 Specifications and Features

- Slim front profile only 18cm wide (7")
- Small footprint 18 x 24cm less than ½ sq foot
- Designed for valve amps of around 9w to 90w
- Designed in Leicester UK
- Ported for extended bass performance
- High 92 dB sensitivity 1 W @1 M
- Easy to drive load for amplifiers
- Simple crossover for and easy driving
- 1" Soft dome tweeter
- 4.5" bass/midrange
- Frequency response 30-22kHz overall
- 50-20kHz -6dB in an average room.
- Matching amplifier impedance 4-8 Ohms
- Audiophile inductors and poly prop caps
- Long grain loudspeaker quality MDF for minimum cabinet colouration
- Real Veneer cabinet
- Integrated plinth.
- Dark Rosewood finish
- Supplied complete with spikes
- Shielded magnets for minimum magnetic field
- Supplied with attractive front cover
- 14kg. each W 18cm. D 24cm H 86 (7x9.5x34in)

Specification subject to change.
